**CARROLL**  
**FOR**  
**KITSAP**

**State Rep.**  
**23<sup>rd</sup> District**

I am Jack Carroll and this is where I stand:

**Leadership:** Over 20 years' experience successfully leading and mentoring a diverse population for the USN.

**Government:** Experience managing large defense contracts with the goal of efficiency, cost effectiveness, timeliness of project completion and product excellence.

**Fiscal Responsibility:** To put state revenues to work on well managed projects, from effective contracted agencies to improve the majority of the residents of Washington and minimize the priority to fund small interest groups and their specific agendas.

**Support for Vulnerable Populations:** Desire to create a better infrastructure of Social Services within Kitsap to benefit our robust community as a whole instead of relying on King County to support our needs.

**Employment Opportunities:** While Kitsap County is a beautiful place to live, for many of us, it doesn't provide living wage employment opportunities. This has been the case for much too long while we have been prisoners to the ferry system. We have not pursued employment opportunities within the Kitsap County, but supported a bedroom community for King County Jobs.

We all have **household budgets to manage**, you have to carefully oversee your money to make sure you can make it to the next paycheck. We should expect nothing less from our elected representatives and I pledge to work hard and **work smarter** on your behalf so that state revenues are not wasted.

Let's **Work Smarter** to fund necessary state budget demands. Our current legislators failed to submit last session's budget on time. The legislators didn't pay for this extension – you the taxpayer did!

One of the biggest issues facing our state legislature is how to implement The McCleary Decision. It is critical for our children, our economy and for the health of our state that we have a plan that thoughtfully manages our resources.

So far, the incumbents in Olympia have failed to find a solution to the McCleary Court case on K-12 education for Washington State's children and our teachers. The added cost to students, teachers and taxpayers is incalculable.

My government contracting and budget experience uniquely qualifies me to **work smarter** and help steer Washington State's education system so that it is in compliance with and is able to meet the challenges of the McCleary Decision. The justices ruled that simply adding more money to the current system is not sufficient for the legislature to meet its constitutional duty. Our PARAMOUNT constitutional duty is to the children of our state.

Kitsap voters need a representative that has the skills and **energy** to **work smarter** and develop solutions that manage our state's budget while fulfilling our responsibilities
