Micaiah,

As you would know if you've ever used the ORCA software, when creating records the city and zip code fields are carried over to the next entity, but the state is reset to WA. In this instance I simply failed to notice that the state listed for DMM Media was "VA" instead of "WA". Obviously they also look very similar.

I've corrected the state to Virginia, and the amended report has already been filed.

Thank you,

Tom Perry
Treasurer
WA Forward
