Micaiah,

This is response to complaint. I did take call and was ask a question is it against State law to close a office completely for training. My answer was to the tax payer who ask me question was I'm not sure if it was against law to close complete office for training. This person who I was talking with has no idea I'm running for office and running for office was not even brought up in conversation. I never use my office or work hours to conduct political business.. When I conduct political business I do it at lunch and off campus. At the time I took this call I did it as employee of Treasurer's office and tryed to answer question best I could at the moment. However I have decided if there is question referencing Assessor's office I will distance myself from that situation and let someone else in office anwser those questions then we can make sure no violation occur in near future. This is good learning experience and I'm glad this came in so I know know how I need conduct self moving forward..
